

## Maintenance & control, without top-ups or contracts

A single path communicator that connects to the property's existing internet via an Ethernet cable plugged directly into the router. This modem enables remote control of the system through the HomeControl+ App or InSite UDL software, with no need to worry about additional data usage, monthly contracts or keeping it topped up.

# DIGI-LAN IP COMMUNICATOR

Partcode	DIGI-LAN
<b>Compatibility</b>	
HomeControl+ App	✓
<b>Key Features</b>	
Formats	Contact ID IP, SIA3 IP, supports uploading/downloading
