ENFORCER V10

ENFORCER**V10**
Integrated security solutions
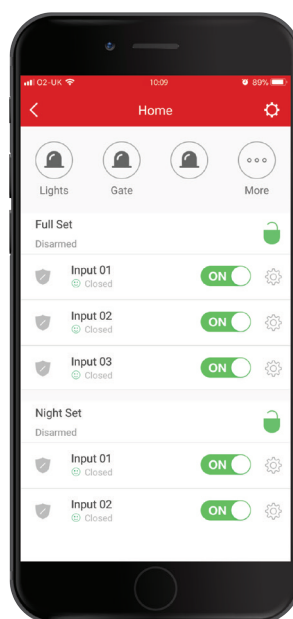

With ProControl+ and
WIFI Camera Capability

The easiest installation choice you'll have to make.

You can now provide the solutions to your end user from one system, the Enforcer V10. Superior security, Wi-Fi connectivity as standard, Full-HD video capabilities, and voice push notifications so users know when important events occur. The Enforcer V10 is changing the game.

COMPLETE CONTROL FROM ANYWHERE IN THE WORLD

Keeping you ahead of the curve with WIFI included as standard

PSTN and traditional phone lines continue to develop issues since the move to digital, while IP communications and push notifications with smart apps go from strength to strength. So, a WIFI module* is supplied for free, as standard with the Enforcer V10, to deliver PyronixCloud and ProControl+ connectivity, along with all the benefits they provide.

Safe on the go control, monitoring and video verification with the ProControl+

- Complete control from anywhere in the world
- Simple set up
- Full-HD video monitoring
- Android & Apple compatible
- Highly secure connection to the highest standard
- Voice push notifications
- Easy switching from security to video

Save money, faster installation, retain customers & increase profitability with the PyronixCloud

- **No on-site IT configuration**
  The Enforcer V10 is connected through a cloud server, so there is no need to set up static IP addresses or configure the network connection on site, instead you simply set up an account on www.PyronixCloud.com.

- **Recurring revenue & retention**
  Streams of recurring revenue can be established by offering PyronixCloud management services; managing this or passing access to users. This increases customer retention and makes the system more profitable.

*All other communication options, including PSTN (DIGI-1200) are sold separately.

ULTIMATE FLEXIBILITY WITH ONE RANGE OF PYRONIX ACCESSORIES

Connect as required with the complete compatibility with all communication options
Whatever the communication need, the Enforcer V10 gives you the option. Simply purchase the option you want and fit it into the panel.

Get to know one & master them all, with fully menu-driven programming
Easily navigate through the menus of the Enforcer V10 with the same uniform menu-driven programming. Simple 'YES/NO' questions allow fast and efficient installing to save both time and money.

Ultimate flexibility with one range of Pyronix accessories
With a whole host of security and life safety peripherals available, the Enforcer range will provide the security solution for any property.

Remote maintenance with Pyronix management software
Using the Pyronix InSite UDL software, the Enforcer V10 can be remotely programmed and diagnosed. The software also enables one of the compulsory twice yearly system maintenance calls to be performed remotely.

Faster installation, less invasion, upsell opportunities & the same superior security with two-way wireless technology

• No wires, no fuss
• One-Push-To-Learn
• Signal Strength Indicators
• Instant Two-Way Device Control (ITDC)
• Self-aware sensors
